EDUCATION

University

Charleston Southern University | Graduated May 2016

Achievements

Bachelor of Arts, Graphic Design - 05/07/2016

PROFESSIONAL EXPERIENCE

Union (Joins Valtech) Full-stack Developer 09/2020 - 05/2023

- At Union I gained extensive experience by performing a variety of tasks and throughout my journey moved between Frontend and Backend focuses. More recently I was Frontend focused while also building out a few CMSs on the Backend with CraftCMS. I also gained some experience with native apps using React Native. Other tools and experience learned includes but is not limited to AWS, CI/CD, Linux Administration. I've mentored more junior developers on projects that I've led or also been a part of building, providing feedback in two stages to try and grow their skill sets on multiple fronts.

Interactive Knowledge Full-stack Developer 12/2018 - 05/2020

- I worked closely with both our creative and development teams to offer both perspectives, as a designer and developer, when needed.
- I learned about the Drupal CMS, primarily in a decoupled architecture.
- I was part of a large Kiosk and Digital Display project where we've created several touch interactives including a large map wall using React and Electron as well as other 3rd party technologies.

Wray Ward Junior Web Developer 05/2017 - 10/2018

- I worked closely with our digital team including other developers, digital designers and more to create engaging user experiences for our clients products.
- I developed the majority of client emails at Wray Ward using a gulp build process for inlining css styles in order to make the emails cross-client compatible.
 - I have developed both simple and advanced emails as well as static and responsive emails.
 - I have uploaded emails to, and worked with, the following Email Services:
 - Emma

- Pardot
 - HubSpot
 - MailChimp
 - Constant Contact
 - Campaign Monitor
- I was the lead, or responsible, developer for several landing pages built on the CodeIgniter framework
 - skylightoffers.com/vms (lead)
 - skylightoffers.com/reroofing
 - tryadvantechsfa.com
 - tryzipsystemstretchtape.com
- I was a part of the larger full-site projects built on the Craft CMS by building out individual components as needed.
- I always do my best to notice inconsistencies or things within our process(es) that could be done better and voice them in a constructive way with a reasonable argument to back it up in order to grow the team as a whole.

CHIEF Supply

Front-End Developer | Graphic Designer

08/2016 - 03/2017

- I performed edits, additions and maintenance on their four magento websites: lydiasuniforms.com, tafford.com, chiefsupply.com, shopuniformwarehouse.com
- I implemented new features, and improved old, to improve the UX for customers
- Designed graphics and coded emails for marketing campaigns using the following:
 - Listrak
 - Bronto
- Designed other various graphics related to current promotions for the websites when needed.
